IIT Bombay Shines at iGEM Grand Jamboree 2024 with Gold Medal and Climate Crisis Nomination

IIT Bombay's iGEM team has achieved a remarkable feat at the iGEM Grand Jamboree 2024, earning a prestigious gold medal for their outstanding work in synthetic biology. The International Genetically Engineered Machine (iGEM) competition is a renowned global platform where students and young researchers collaborate to develop innovative, biology-based, solutions to address real-world challenges.

IIT Bombay's team was also honoured with a nomination for the Best Climate Crisis Project, a testament to their exceptional contributions in sustainability. This success reflects their dedication and ingenuity in tackling pressing global issues through science and innovation.

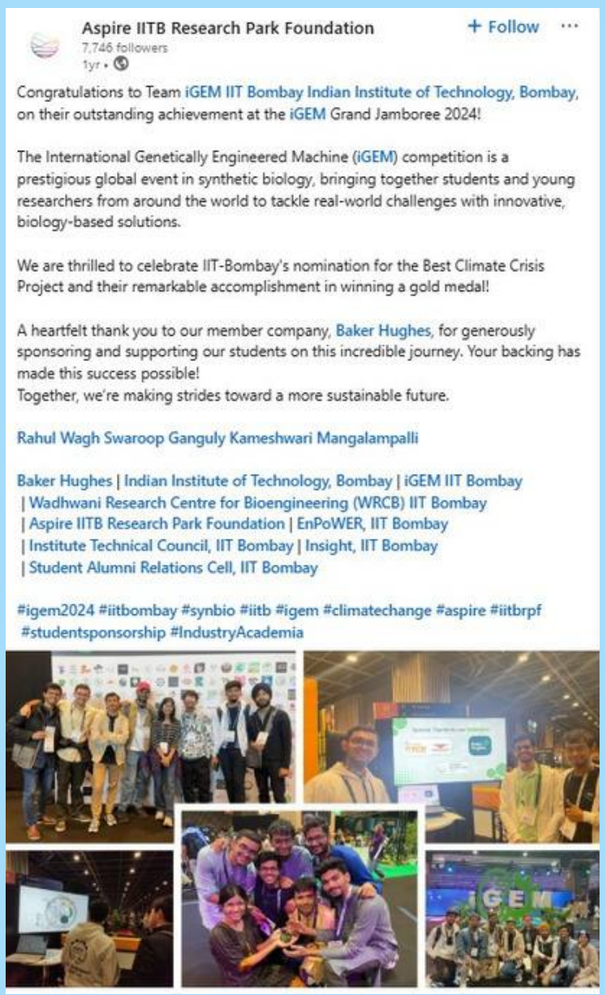

The energy industry leader, Baker Hughes, was instrumental in this achievement through their generous sponsorship and steadfast support. Partnerships like these enable IIT Bombay to advance its mission of creating a more sustainable and impactful future.

As always, IIT Bombay is committed to excellence in research and innovation. By blending academic rigor with real-world impact, the iGEM team exemplifies the Institute's dedication to shaping a sustainable future. With continued support from industry partners, IIT Bombay is poised to inspire and lead in the field of synthetic biology and drive transformative solutions for global challenges.

IIT BOMBAY HEARTFELT SUPPORT

RESEARCH PARK'S VALUABLE SUPPORT

The All India iGEM Meet, hosted by the Institute of Chemical Technology (ICT), served as both our formal debut and a powerful catalyst for our journey ahead. After weeks of tireless preparation for the "mini Indian Jamboree," we presented Aureolyze to a distinguished panel of judges. Their insightful feedback and encouraging words provided the validation we needed to push our boundaries further. The highlight of the event was the poster presentation session, where we engaged with over 100 students and veteran researchers. We are thrilled to share that Aureolyze was recognized with the Best Poster Award. As our first major achievement of the tenure, this victory is incredibly special to us. It has fueled our momentum and reinforced our commitment to excellence as we head toward the Grand Jamboree

WRCB APPLAUDS IIT BOMBAY iGEM TEAM'S GLOBAL ACHIEVEMENT

The Wadhwani Research Centre for Bioengineering (WRCB), IIT Bombay, congratulates the IIT Bombay iGEM Team for winning a Silver Medal at the International Genetically Engineered Machine (iGEM) Competition 2025, competing among over 400 teams worldwide. WRCB appreciates the team's innovative project addressing biofilm-associated and antimicrobial-resistant infections, a major global healthcare challenge.

Theinterdisciplinary workintegrated synthetic biology and machine learning to develop a novel AMR-focused therapeutic strategy targeting persistent biofilms and dormant bacterial populations. The team also gained valuable international exposure, initiated connections for potential startup translation, and began preparing their work for publication. WRCB commends the team's dedication, innovation, and excellence.

BIOQUEST ON TIMES OF INDIA

The Bioquest initiative recently reached over 1,500 students, igniting a city-wide interest in Synthetic Biology. Beyond the numbers, the program's impact was cemented when a student team reached out to launch a "Mathematics in Synthetic Biology" club. By bridging the gap between equations and ecosystems, Bioquest has successfully empowered Mumbai's next generation of multidisciplinary innovators.
